### Standard curve for *in vitro* cell culture test

Table B-1: Absorbance of MTT standard.

| Number of cells | Absorbance |       |       |       |       |       |
|-----------------|------------|-------|-------|-------|-------|-------|
|                 | #1         | #2    | #3    | #4    | mean  | SD    |
| 5,000           | 0.05       | 0.044 | 0.052 | 0.047 | 0.048 | 0.004 |
| 10,000          | 0.07       | 0.081 | 0.07  | 0.074 | 0.074 | 0.005 |
| 20,000          | 0.144      | 0.131 | 0.159 | 0.166 | 0.150 | 0.016 |
| 40,000          | 0.282      | 0.276 | 0.283 | 0.302 | 0.286 | 0.011 |
| 80,000          | 0.514      | 0.51  | 0.526 | 0.559 | 0.527 | 0.022 |

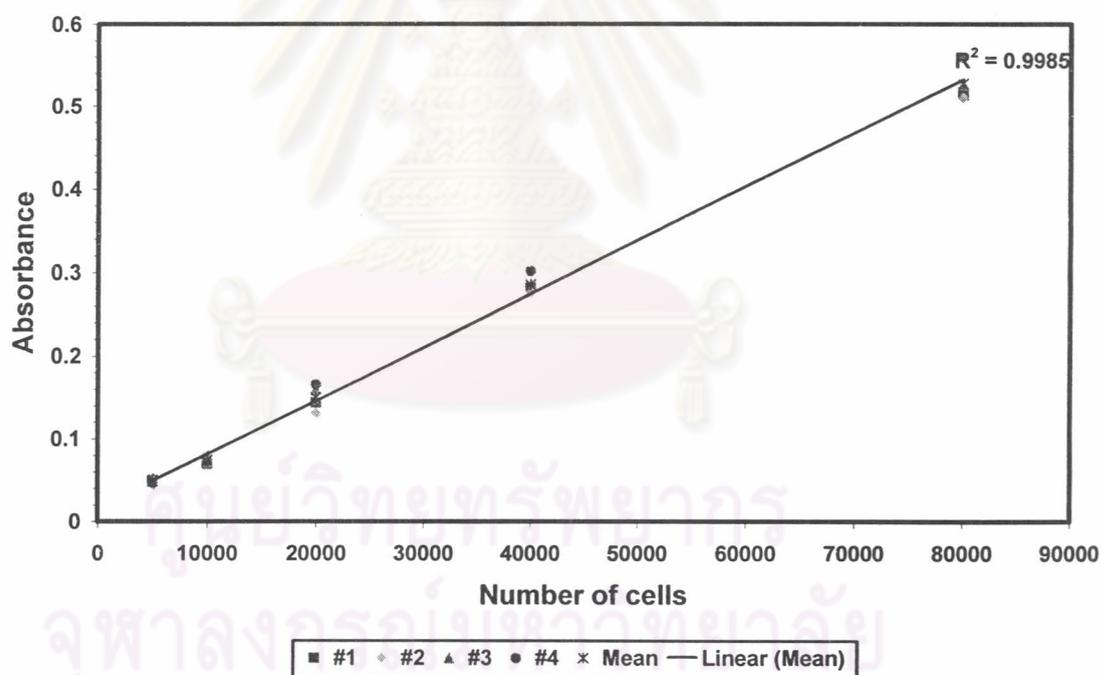

Figure B-1: MTT standard curve

## APPENDIX C

### Calculation of scaffold cost

**Basis:**  $10 \times 10 \times 0.5 \text{ cm}^3$  scaffold size

Gelatin: 2,160 baht/kg

Collagen: 30,000 baht/kg of 0.6wt% solution

Scaffold size =  $10 \times 10 \times 0.5 \text{ cm}^3 \approx 50 \text{ g}$  of collagen/gelatin solution

**Table C-1:** Cost of gelatin and collagen in scaffold fabrication.

| Solution concentration | Scaffold type | collagen used* (g) | collagen solution used** (g solution) | cost of collagen*** (baht) | cost of gelatin (baht) | saving cost (baht) |
|------------------------|---------------|--------------------|---------------------------------------|----------------------------|------------------------|--------------------|
| 0.4wt%                 | C100          | 0.2                | 33.00                                 | 990                        | 0.00                   | 0                  |
|                        | CG30/70       | 0.06               | 9.90                                  | 297                        | 0.30                   | 693                |
|                        | CG20/80       | 0.04               | 6.60                                  | 198                        | 0.35                   | 792                |
|                        | CG10/90       | 0.02               | 3.30                                  | 99                         | 0.39                   | 891                |
| 0.6wt%                 | A             | 0.2                | -                                     | -                          | 0.43                   | -                  |
|                        | C100          | 0.3                | 49.50                                 | 1485                       | 0.00                   | 0                  |
|                        | CG30/70       | 0.09               | 14.85                                 | 446                        | 0.45                   | 1040               |
|                        | CG20/80       | 0.06               | 9.90                                  | 297                        | 0.52                   | 1188               |
|                        | CG10/90       | 0.03               | 4.95                                  | 149                        | 0.58                   | 1337               |
|                        | A             | 0.3                | -                                     | -                          | 0.65                   | -                  |

**Example: 0.4C100**

\* collagen used =  $(0.4\text{wt}\%) \times 50 \text{ g of solution} = 0.2 \text{ g collagen} = 200 \text{ mg collagen}$

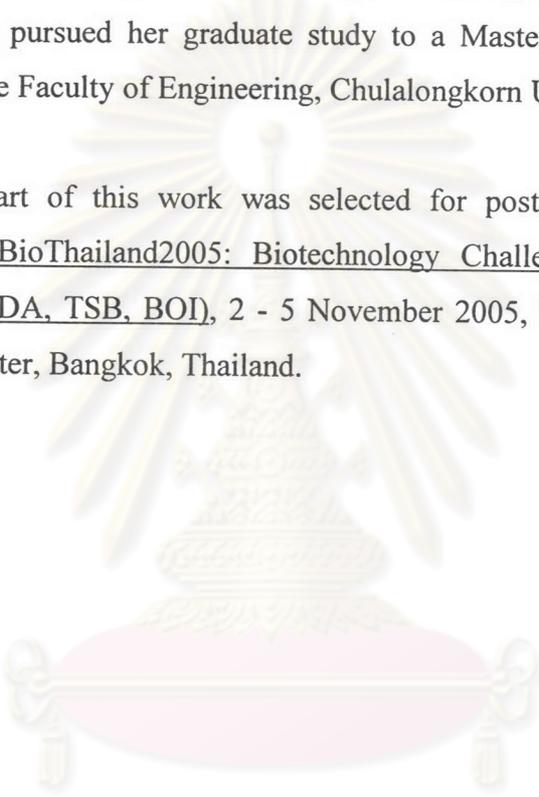

\*\* collagen solution used =  $(200 \text{ mg collagen}) / (6.06 \text{ mg collagen/g collagen solution}) = 33 \text{ g collagen solution}$

\*\*\* cost of collagen =  $((33 \text{ g collagen solution}) \times (30000 \text{ baht})) / 1000 \text{ g collagen solution} = 990 \text{ baht}$

## VITAE

Miss Juthamas Ratanavaraporn was born in Bangkok, Thailand on January 16, 1982. She finished the high school education in 1999 from Horwang school. In 2003, she received her Bachelor Degree of Engineering with a major of Chemical Engineering from Faculty of Engineering, Chulalongkorn University. After the graduation, she pursued her graduate study to a Master of Engineering (chemical engineering), the Faculty of Engineering, Chulalongkorn University.

Some part of this work was selected for poster presentation in medical technology at BioThailand2005: Biotechnology Challenges in the 21<sup>st</sup> Century (BIOTEC, NSTDA, TSB, BOI), 2 - 5 November 2005, The Queen Sirikit National Convention Center, Bangkok, Thailand.
