

CHAPTER 3

RESULTSAntibacterial Activities of Medicinal Plants

Activities of four extracts, petroleum ether, ethyl ether, ethanol, and water, of 63 species belonging to 35 families were tested against eight species of microorganisms : Bacillus subtilis, Escherichia coli, Lactobacillus fermentum, Pseudomonas aeruginosa, Salmonella typhi, Shigella dysenteriae, Staphylococcus aureus, and Streptococcus faecalis. The results are shown in Table 7, pages 57 to 104.

Determination of Minimal Inhibitory Concentration (MIC)

Determination of Minimal Inhibitory Concentration (MIC) of active antibacterial extracts against microorganisms in vitro has been done and the results are shown in Table 8, pages 106 to 110.

Antibiotic Control

Nine antibiotic controls, Streptomycin, Tetracycline, Chloramphenicol, Colimycin, Neomycin, Penicillin, Ampicillin, Kanamycin, Cefalotin were tested against eight species of microorganisms. The results are shown in Table 9, page 111.

Chemical Tests of Active Antibacterial Extracts from Medicinal Plants

The results of eight chemical tests of Dragendorff's reagent, Marme's reagent, Wagner's reagent, Liebermann-Burchard's reagent, Kedde's reagent, Raymond's reagent, Keller-Kiliani's reagent, against active antibacterial extracts from medicinal plants are shown in Table 10, pages 112 to 114.

Percentage Yield of Extracts

Yield of four extracts of all medicinal plants studied are shown in Table 11, pages 115 to 117.

Results of antibacterial activities of all medicinal plants studied which have been listed according to

- (i) Families of plants,
- (ii) Test microorganism,
- (iii) Solvents used,
- (iv) Part(s) of plants used.

All of these are shown in Tables 12, 13, 14 and 15 respectively.

Illustrated plates showing inhibition zones of some plant extracts can be seen from Figures 1 - 12, pages 122 to 126.

Table 12
Results Listed According to the Families of Plants Tested.

| Families | No. of Crude Drugs Tested | No. of Effective Crude Drugs |
|---------------------|---------------------------|------------------------------|
| Acanthaceae | 2 | 2 |
| Angiopteridaceae | 1 | 1 |
| Annonaceae | 1 | 1 |
| Apocynaceae | 1 | - |
| Araceae | 1 | 1 |
| Araliaceae | 1 | 1 |
| Basellaceae | 2 | 2 |
| Bixaceae | 1 | 1 |
| Caesalpiniaceae | 5 | 5 |
| Compositae | 5 | 5 |
| Cucurbitaceae | 2 | 2 |
| Euphorbiaceae | 3 | 3 |
| Gramineae (Poaceae) | 2 | 2 |
| Labiatae | 1 | 1 |
| Liliaceae | 3 | 3 |
| Lythraceae | 1 | 1 |
| Meliaceae | 1 | 1 |
| Menispermaceae | 2 | 2 |
| Mimosaceae | 2 | 2 |
| Moraceae | 1 | 1 |
| Myrsinaceae | 1 | 1 |
| Myrtaceae | 1 | 1 |
| Nymphaeaceae | 1 | 1 |
| Oxalidaceae | 2 | 2 |
| Palmae | 1 | 1 |
| Papilionaceae | 1 | 1 |
| Piperaceae | 1 | 1 |
| Plumbaginaceae | 1 | 1 |
| Rutaceae | 2 | 2 |
| Sapindaceae | 1 | 1 |
| Umbelliferae | 1 | 1 |
| Urticaceae | 1 | 1 |
| Verbenaceae | 3 | 3 |
| Vitaceae | 1 | 1 |
| Zingiberaceae | 7 | 7 |

Table 13

Results Listed According to the Test Microorganisms.

| Test Microorganisms | No. of Crude Drugs Tested | No. of Effective Crude Drugs | Effective % |
|---|---------------------------|------------------------------|-------------|
| <u>Bacillus subtilis</u> ATCC 6633 | 63 | 56 | 88.9 |
| <u>Escherichia coli</u> ATCC 10536 | 63 | 49 | 77.9 |
| <u>Lactobacillus fermentum</u> ATCC 9338 | 63 | 4 | 6.4 |
| <u>Pseudomonas aeruginosa</u> (Med. Tech.) | 63 | 38 | 60.4 |
| <u>Salmonella typhi</u> (Med. Tech.) | 63 | 52 | 82.5 |
| <u>Shigella dysenteriae</u> 115 118 1SS | 63 | 45 | 71.4 |
| <u>Staphylococcus aureus</u> ATCC 1538-P | 63 | 59 | 93.8 |
| <u>Streptococcus faecalis</u> (Med. Tech.) | 63 | 19 | 30.2 |

Table 14
Results Listed According to the Solvents Used.

| Solvent Used | No. of Crude Drugs Tested | No. of Effective Crude Drugs | Effective Ratio* |
|------------------|---------------------------|------------------------------|------------------|
| Petroleum ether | 63 | 22 | 60 |
| Ether | 63 | 56 | 266 |
| Ethanol | 63 | 46 | 153 |
| H ₂ O | 63 | 12 | 24 |

* The figure represents the sum of the species of microorganisms which were inhibited by each extract.

Table 15
Results Listed According to the Parts of Plants Used.

| Parts of the Plants Used | No. of Crude Drugs Tested | No. of Effective Crude Drugs |
|--------------------------|---------------------------|------------------------------|
| Rhizome | 9 | 9 |
| Roots | 2 | 2 |
| Stem-bark | 2 | 2 |
| Leaves | 31 | 30 |
| Fruits & Seeds | 5 | 5 |
| Whole plants | 12 | 12 |
| Bulbs | 2 | 2 |
| Flowers & Anthers | 3 | 3 |
