A P P E N D I X

Vanillin - Sulphuric reagent

Spray reagent : 3 gm Vanillin is dissolved in 100 ml absolute ethanol, and 0.5 ml sulphuric acid(d1.84) is added to the solution.

Treatment : Heat to 120°C until green - blue spots are seen.

Solvents and chemicals used

95% ethanol

10% aqueous lead acetate solution

chloroform

acetone

anesthetic ether

ethyl acetate

sodium sulphate anhydrous

VITA

Mrs. Pimolwan Tappayuthpijarn (Senawongse) was born on November 23, 1955 in Bangkok, Thailand. She received the degree of B.Sc. in 1977 from the Department of Botany, Faculty of Science, Chulalongkorn University.

Since graduation ,she has been employed in the Department of Pharmacology, Faculty of Medicine, Siriraj Hospital, Mahidol University.
