Thesis

Submitted in partial fulfillment of the requirements for the

Degree of Master of Science

in

The Chulalongkorn University Graduate School

Department of Physics

March, 1965

(B.E. 2508)

Accepted by the Graduate School, Chulalongkorn University in
partial fulfillment of the requirements for the Degree of Master
of Science.

PREFACE

The author wishes to express his sincere appreciation to the following persons: to Professor Hong Samudabhandu, Head of the Physics Department, for his interest in this work ; to Professor Charoon Thanyaphanij, for his excellent advice and guidance during the supervision in this research; and to Mr. Charoon Sittipongso for his valuable advice and for the help in exposing and developing the nuclear emulsion plates.

Likit Shutrasakul.

TABLE OF CONTENTS

ABSTRACT.....	111
PREFACE.....	17
LIST OF TABLES.....	21
LIST OF ILLUSTRATIONS.....	vii

Chapter

I. INTRODUCTION.....	1
II. HIGH- AND SUPERSONIC FLOW CHARACTERISTICS OF PARTICLES.....	20
III. FLOW DEVELOPMENT OF GASES AND PARTICLES.....	29
IV. EXPERIMENTAL METHODS.....	31
V. EXPERIMENTAL RESULTS.....	33
VI. DISCUSSION OF RESULTS AND CONCLUSIONS.....	53
APPENDIX.....	77
BIBLIOGRAPHY.....	123

INDEX OF PLATES

Table	Page
1. Stars on the Enlarged Plates Developed on 29 January 1968.....	30
2. Stars on the Plate No.1 Developed on 16 April 1968 under Various Thicknesses of Absorbance.....	39
3. Stars on the Plate No.2 Developed on 16 April, 1968 under Various Thicknesses of Absorbance.....	40
4. Stars on the Plate No.3 Developed on 16 April, 1968 under Various Thicknesses of Absorbance.....	41
5. Average Number of Stars on the Plates under Various Thicknesses of Absorbance.....	42
6. Total Stars Observed on the Plates, Including 2-Strong Stars.....	43
7. Stars Formed in $\frac{1}{6}$ Days under Various Thicknesses of Absorbance and the Total Rate of Production of Stars.....	44
8. Number of Stars with More than a-Range in Various Thicknesses of Absorbance.....	45
9. Total Stars Observed on the Plates, Including 2-Strong Stars.....	46

TABLE OF CONTENTS

Figure	Page
1. Frequency Distributions of Stars with Sixty Stars, at Ground Level, Norfolk, Scotland, Latitude 55°46' N. on Ulster K2 Filter 400 Microns Width.....	117
2. Size Distributions of Stars.....	120
3. Stars Found in 70 Days under Various Distances of Absorption.....	125
4. Abundance Curve of the Star Population, Including 2-Beam Stars.....	130
5. The Number of Stars with Two Stars and Stars, under Various Distances of Absorption.....	131
6. Abundance Curve of the Star Population, Including 2-Beam Stars.....	132
