<sup>#</sup> the percentages of occurrence (Krebs, 1999) is the proportion of the number of time which found the ant in the total of time which surveys as follows:

$$\% \text{ Occurrence} = \frac{\text{Number finding of species A}}{\text{Total time of surveys}} \times 100$$

## BIOGRAPHY

Miss Pitinan Torchote was born on December 31, 1983, in Nong Khai province. She received her Bachelor's Degree of Science (Biology) from the Department of Biology, Faculty of Science, Mahidol University in 2006. Her Master's degree study in Zoology, Department of Biology, Faculty of Science, Chulalongkorn University was supported by the Thai government budget 2007, under the Research Program on Conservation and Utilization of Biodiversity and the Center of Excellence in Biodiversity, Faculty of Science, Chulalongkorn University (CEB\_M\_37\_2007) and Chulalongkorn University Graduate Scholarship.
