Thesis Title COATING OF UREA FERTILIZER WITH CARDANOL
By Miss Piyanant Pattanasittisaree
Field of Study Petrochemistry and Polymer Science
Thesis Advisor Associate Professor Amorn Petsom, Ph.D.

Accepted by the Faculty of Science, Chulalongkorn University in Partial
Fulfillment of the Requirements for the Master's Degree

 Dean of the Faculty of Science
(Professor Supot Hannongbua, Dr.rer.nat.)

THESIS COMMITTEE

 Chairman
(Associate Professor Sirirat Kokpol, Ph.D.)

 Thesis Advisor
(Associate Professor Amorn Petsom, Ph.D.)

 Examiner
(Associate Professor Nuanphun Chantasiri, Ph.D.)

 Examiner
(Associate Professor Somchai Pengprecha, Ph.D.)

 External Examiner
(Nantanit Wanichacheva, Ph.D.)

ปีะนันท์ พัฒนาสิทธิเสรี : การเคลือบปุ๋ยญี่รีด้วยคาร์ดานอล (COATING OF UREA FERTILIZER WITH CARDANOL) อ.ที่ปรึกษาวิทยานิพนธ์หลัก : รศ.ดร.อนร เพชรส, 105 หน้า.

ได้ทำการศึกษาญี่รีดความคุณการปลดปล่อยที่เคลือบด้วยคาร์ดานอล โดยเปรียบเทียบสมบัติ ต่างๆของพื้นเมือง เซ่น เวลาในการแห้งตัว ความแข็ง การขีด劃 ความเงางาม การทนน้ำ และการทนกรด/ด่างของพื้นที่เตรียมจากคาร์ดานอล เซ่น คาร์ดานอลที่ผ่านกระบวนการพรีโพลิเมอไโรเชชัน คาร์ดานอลที่ผ่านกระบวนการพรีโพลิเมอไโรเชชันที่ผสมกับน้ำมันซักแห้งชนิดต่างๆ เซ่นน้ำมันดังน้ำมันลินสีด และคาร์ดานอล-ฟอร์มัลดีไฮด์เรซิน จากนั้นเลือกเวลาที่สักที่สุด พบว่าของผสมระหว่างคาร์ดานอลที่ผ่านกระบวนการพรีโพลิเมอไโรเชชันและน้ำมันดังในสัดส่วน 9:1 (น้ำหนัก/น้ำหนัก) ที่ 80 องศาเซลเซียส ในเวลาแห้งตัวที่สักที่สุดและได้รับเลือกให้เป็นวัสดุเคลือบต่อไป ประมาณวัสดุเคลือบที่เหมาะสมที่สุดคือ 6 % โดยน้ำหนักของปุ๋ย และใช้โคบอลต์แบนฟีเนต และเทอร์เทียริบิวทิลไออกไซด์ร์ออกไซด์ ที่ 6 % ของวัสดุเคลือบเป็นตัวเร่งปฏิกิริยา ปุ๋ยญี่รีดที่เคลือบได้จะมีเปลือกหุ้มที่แข็ง เป็นเงา และไม่คลายน้ำ จากการศึกษาการปลดปล่อยธาตุอาหารพบว่า ปุ๋ยญี่รีดที่เคลือบแล้วจะให้การปลดปล่อยที่ช้ากว่ายญี่รีดที่ไม่ได้เคลือบ อุณหภูมิสูงเร่งการปลดปล่อยญี่รีดขณะที่ภาวะความเป็นด่างจะลดการปลดปล่อย นอกจากนี้ยังพบว่ายญี่รีดที่ปลดปล่อยจากปุ๋ยที่เคลือบด้วยของผสมระหว่างคาร์ดานอลที่ผ่านกระบวนการพรีโพลิเมอไโรเชชันและน้ำมันดังที่ความหนาประมาณ 125 ไมครอนจะสามารถปลดปล่อยปุ๋ยได้นานถึง 3 เดือน

5072364723 : MAJOR PETROCHEMISTRY AND POLYMER SCIENCE

KEYWORDS : Cardanol / Drying oil / Slow released /Urea fertilizer

PIYANANT PATTANASITTISAREE : COATING OF UREA
FERTILIZER WITH CARDANOL. THESIS ADVISOR : ASSOC.
PROF. AMORN PETSOM, Ph.D., 105 pp.

Controlled release urea coated with cardanol was investigated. Film properties such as drying time, hardness, adhesion, glossiness, water resistant and acid/base resistant of various cardanol based films for example, film prepared from prepolymerization cardanol, prepolymerization cardanol blended with drying oils such as tung oil, linseed oil and cardanol-formaldehyde resin were compared. Then the shortest drying time for coating was selected. It was found that a mixture of prepolymerization cardanol and tung oil at ratio 9:1 (w/w) at 80 celcius gave the shortest drying time and it was selected as a coating material. The most suitable amount of coating material was 6 % by weight of fertilizer. Cobalt naphthenate and tertiary butylhydroperoxide at 6 % (w/w) of coating material were used as catalyst. The coated urea had hard coating film, glossy and did not dissolve in water. When the nutrient release was investigated, it was found that coated urea gave lower release rate than uncoated urea. Moreover, the thicker coated film gave slower release rate. The high temperature accelerated urea release while alkaline condition retarded release rate. In addition, it was found that urea release from fertilizer coated with a mixture of prepolymerization cardanol and tung oil at approximate 125 micron thickness could be prolonged to three months.

Field of Study : Petrochemistry and Polymer Science

ACKNOWLEDGEMENTS

I would like to express my deepest appreciation and gratitude to Associate Professor Amorn Petsom, Ph.D., my advisor for his excellent suggestion, guidance, encouragement and supportive throughout the entire period of conducting this thesis.

I would also like to extend my gratitude to Associate Professor Sirirat Kokpol, Ph.D., Associate Professor Nuanphun Chantarasiri, Ph.D., Associate Professor Somchai Pengprecha, Ph.D., and Nantanit Wanichacheva, Ph.D., for serving as the committee and for their editorial assistance and comments.

I would like to thank the staffs of Institute of Biotechnology and Genetic Engineering, the staffs of Petrochemistry and Polymer Science Program, Faculty of Science, Chulalongkorn University for their support and help. The financial support to conduct this research from The 90th Anniversary of Chulalongkorn University Fund (Ratchadaphiseksomphot Endowment Fund) and Center of Petroleum, Petrochemicals, and Advanced Materials are also gratefully acknowledged.

Finally, my deepest gratitude is to my family for their support, understanding, and encouragement throughout my study.
