**IMPROVEMENT OF AVIATION SERVICES OPERATIONS :  
A BENCHMARKING APPROACH**

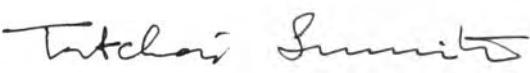

**MR. THEPARATH TINSOMBOON**

A Thesis Submitted in Partial Fulfillment of the Requirements  
for the Degree of Master of Engineering in Engineering Management  
Regional Centre for Manufacturing Systems Engineering  
Faculty of Engineering  
Chulalongkorn University  
Academic Year 1999

THESIS TITLE : IMPROVEMENT OF AVIATION SERVICES OPERATIONS :  
A BENCHMARKING APPROACH  
BY : MR. THEPARATH TINSOMBOON  
DEPARTMENT : REGIONAL CENTRE FOR MANUFACTURING SYSTEMS ENGINEERING  
THESIS ADVISOR : ASSOC. PROF. CHUVEJ CHANSA-NGAVEJ Ph.D.  
THESIS CO-ADVISOR : MR. SANGUAN SENANORIT

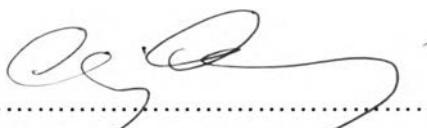

---

Accepted by the Faculty of Engineering, Chulalongkorn University in Partial  
Fulfillment of the Requirements for the Master's Degree.

 ..... Dean of Faculty of Engineering  
( Associate Professor Dr. Tatchai Sumitra )

Thesis Committee

 ..... Chairman  
( Associate Professor Dr. Tatchai Sumitra )

 ..... Thesis Advisor

THEPARATH TINSOMBOON : IMPROVEMENT OF AVIATION SERVICES OPERATION : A BENCHMARKING APPROACH. THESIS ADVISOR : ASSOC. PROF. CHUVEJ CHANSA-NGAVEJ , Ph.D. THESIS CO-ADVISOR : MR. SANGUAN SENANORIT, 240 pages

ISBN-974-333-406-8

At present, the air transportation system is one of the most important industry segments that play an important role for the development of economic and social in Thailand. The success of air transportation in Thailand's economic and social development depends heavily on the safe and efficient operations of air traffic control services.

Many countries in this region aim to be the leader in air transportation system and operate as the center of aviation in this region. Moreover, air traffic volume has increased continuously. Therefore, the Aeronautical Radio of Thailand Ltd.( Aerothai) must improve its air traffic control system to make it safe and efficient with the potential power to be the aviation leader in the region.

Benchmarking, a competitive and powerful tool widely-used for competitive companies worldwide to search for industrial best practices that lead to superior performance, can be applied for air traffic control services. The study presents the improvement of Aerothai's air traffic control services by using benchmarking as a methodology. The study compares Aerothai's service performance as well as service operations with Federal Aviation Administration (FAA), with focus on three main factors as follows: 1) quality of service 2) technological support and 3) human operations. The results of the benchmarking study give the comparative information and create the best practices that will assist Aerothai in improving its operations and lifting its level of services in its attempt to gain a competitive advantage as the aviation service leader.

## ACKNOWLEDGEMENTS

I would like to take this opportunity to express my deep appreciation to my advisor :

Dr. Chuvej from Chulalongkorn University and my co-advisor : Mr. Sanguan from the Aeroautical Radio of Thailand Ltd. who contribute valuable suggestions through helpful comments. I would like to give my sincere thanks to all academic staffs from Chulalongkorn University and the University of Warwick, U.K. who taught me the knowledge in the field. My special thanks go to my friend Mr. Jitkaseam from Aerothai who assists me in conducting the pilots' survey. Many thanks go to Miss Porntippar who assisted me in typing the thesis project, and everyone concerned in Aerothai who provided some necessary information. Without them, my thesis project would not be completed.

I would like to thank the Administration Staffs at Aerothai who provided the financial support throughout this program.

I wish to express my love and my deep appreciation to my parents who give me moral support, encouragement, love and care.

Finally, my success is dedicated to my parents, my brothers, my friends and my company. Thank you very much to you all.

## LIST OF TABLES

|  | Pages |
|--|-------|
| Table 1.1 Phase of Flight in Control Airspace.....                       | 5     |
| Table 1.2 Aircraft Movements at All Thailand's Airports.....             | 10    |
| Table 3.1 The Five Company Models.....                                   | 31    |
| Table 3.2 The Five Company Models (continued).....                       | 32    |
| Table 3.3 Selection Criteria Matrix.....                                 | 47    |
| Table 3.4 The Description of Selection Criteria Matrix.....              | 48    |
| Table 3.5 Data Collection Methods.....                                   | 50    |
| Table 4.1 Benchmarked Company Analysis.....                              | 83    |
| Table 4.2 The Description of Selection Criteria Matrix.....              | 84    |
| Table 4.3 The Scores for Selection Criteria.....                         | 85    |
| Table 4.4 Summation of Total Scores.....                                 | 89    |
| Table 4.5 Performance Data List.....                                     | 92    |
| Table 4.6 Profile Summary of Internal Data Collection.....               | 103   |
| Table 4.7 Profile Summary of External Data Collection.....               | 113   |
| Table 4.8 Table of Performance Comparison.....                           | 114   |
| Table 4.9 Quality of Service Comparison.....                             | 116   |
| Table 4.10 Technological Support Performance Comparison.....             | 116   |
| Table 4.11 Human Operation Performance Comparison.....                   | 118   |
| Table 4.12 Quality of Service Gap.....                                   | 123   |
| Table 4.13 The Areas that Need Improvement of Quality of Service.....    | 124   |
| Table 4.14 Technological Support Performance Gap.....                    | 124   |
| Table 4.15 The Areas that Need Improvement of Technological Support..... | 125   |
| Table 4.16 Human Operations Performance Gap.....                         | 126   |
| Table 4.17 The Areas that Need Improvement of Human Operations.....      | 128   |

|            |   |     |
|------------|---|-----|
| Table 4.18 | Comparative Analyses of the Practice to Safe Operations.....        | 137 |
| Table 4.19 | Comparative Analyses of the Practices to Timeliness of Service..... | 137 |
| Table 4.20 | Comparative Analyses of the Practices to Fight Efficiency.....      | 138 |
| Table 4.21 | Comparative Analyses of the Practices to Human Operations.....      | 139 |
| Table 4.22 | Comparative Analyses of the Practices to Technological Support..... | 140 |
| Table 4.23 | Projected Performance Required.....                                 | 143 |
| Table 4.24 | The Best Practices for Safe Operations.....                         | 149 |
| Table 4.25 | The Best Practices for Timeliness of Service.....                   | 150 |
| Table 4.26 | The Best Practices for Flight Efficiency.....                       | 151 |
| Table 4.27 | The Best Practices for Human Operations.....                        | 152 |
| Table 4.28 | The Best Practices for Technological Support.....                   | 153 |
| Table 4.29 | The Opportunities for Improvement of Safe Operations.....           | 158 |
| Table 4.30 | The Opportunities for Improvement of Timeliness of Service.....     | 159 |
| Table 4.31 | The Opportunities for Improvement of Flight Efficiency.....         | 160 |
| Table 4.32 | The Opportunities for Improvement of Human Operations.....          | 162 |
| Table 4.33 | The Opportunities for Improvement of Technological Support.....     | 163 |
| Table 4.34 | The Results of Verification of Best Practices.....                  | 171 |
| Table 4.35 | The Performance Goal of Quality of Service.....                     | 174 |
| Table 4.36 | The Performance Goal of Technological Support.....                  | 175 |
| Table 4.37 | The Performance Goal of Human Operations.....                       | 176 |
