Appendix B Determination of Ohmic Linear Regime

Linear regime or ohmic regime is the regime that applied voltage depends directly on the applied current according to ohmic law in equation (B1)

In this work, linear regime was determined by plotting applied voltage (V_0) versus current (I). The range that gives the straight line is acceptable for using in conductivity measurement. Figure B1 is the plot between V_0 versus I of the silicon wafer, as a standard material, using custom built two-point probe.

$$V_0 = IR \quad (B1)$$

where V_0 = applied voltage (V)

I = current (A)

R = resistance (Ω)

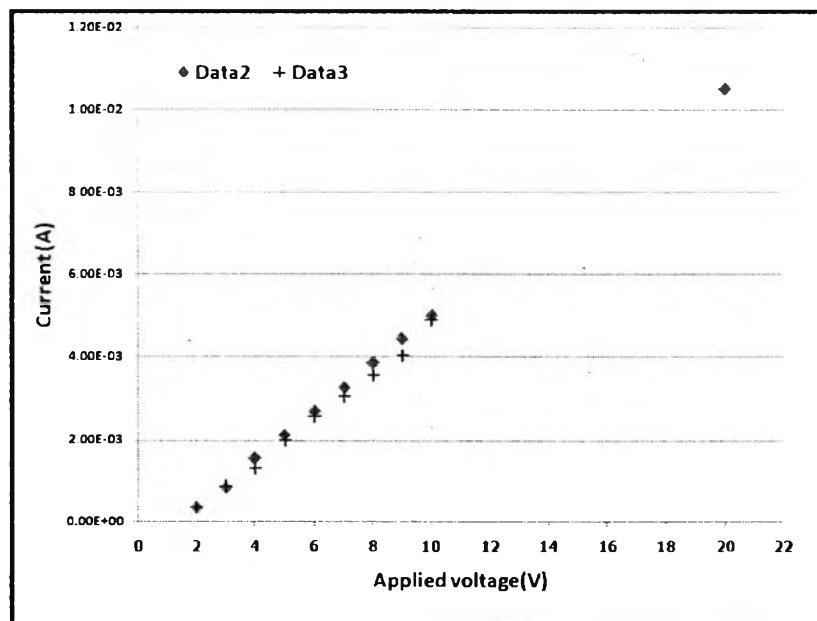

Figure B1 Linear regime of V_a and I of the silicon wafer, which was used as a standard material, obtained by the custom built two-point probe.

According to Figure B1, straight line is indicated the range of applied voltage and current corresponding to the ohmic law. The accepted range of those for using in conductivity measurement are 2 to 20 Volt.

Table B1 Raw data of determination of linear regime from silicon wafer by using custom built two-point probe

Applied voltage (V)	Current (A ₂)	Current (A ₃)
20	0.010526	-
10	0.004999	0.004894
9	0.004446	0.004054
8	0.003873	0.00359
7	0.003295	0.003076
6	0.002717	0.002581
5	0.002143	0.002007
4	0.001567	0.001330
3	0.000869	0.000885
2	0.000345	0.000357

Appendix C Determination of Geometric Correlation Factor (K) of Custom Built Two-Point Probe

Geometric correction factor (K) is a correction that takes into account of geometric effects. K factor can be determined by using the following equation (C1).

$$K = \frac{\rho_{ref} \times I}{t \times V} \quad (C1)$$

Where K = geometric correction factor

ρ_{ref} = resistivity of standard material (Ω.cm)

R = resistivity (Ω)

t = sheet thickness (cm)

V = applied voltage (V)

I = current (A)

The silicon wafer with known resistivity per thickness of 107.373 Ω was used as a standard material for the determination of geometric correction factor (K).

Table C1 Raw data of determination of the geometric correction factor (K) from silicon wafer, as a standard material

Applied voltage (V)	Current (A2)	Current (A3)	K2	K3	Average
20	1.0526×10^{-2}	-	4.9017×10^{-6}		4.9017×10^{-6}
10	4.9991×10^{-3}	4.8938×10^{-3}	4.6558×10^{-6}	4.5577×10^{-6}	4.6068×10^{-6}
9	4.4459×10^{-3}	4.0537×10^{-3}	4.6006×10^{-6}	4.1948×10^{-6}	4.3977×10^{-6}
8	3.8732×10^{-3}	3.5905×10^{-3}	4.5090×10^{-6}	4.1799×10^{-6}	4.3444×10^{-6}
7	3.2945×10^{-3}	3.0762×10^{-3}	4.3833×10^{-6}	4.0928×10^{-6}	4.2381×10^{-6}
6	2.7174×10^{-3}	2.5808×10^{-3}	4.2180×10^{-6}	4.0060×10^{-6}	4.1120×10^{-6}
5	2.1432×10^{-3}	2.0068×10^{-3}	3.9920×10^{-6}	3.7380×10^{-6}	3.8650×10^{-6}
4	1.5669×10^{-3}	1.3302×10^{-3}	3.6483×10^{-6}	3.0971×10^{-6}	3.3727×10^{-6}
3	8.6855×10^{-4}	8.8462×10^{-4}	2.6963×10^{-6}	2.7462×10^{-6}	2.7213×10^{-6}
2	3.4502×10^{-4}	3.5708×10^{-4}	1.6066×10^{-6}	1.6628×10^{-6}	1.6347×10^{-6}
Average					3.8194×10^{-6}
SD					9.9121×10^{-7}

According to Figure B1, the accepted range for using in conductivity measurement of silicon wafer covered the range of applied voltage from 2 to 20 V. Therefore, the geometric correction factor (K) for the conductive samples of custom built two-point probe is 3.8194×10^{-6}

Appendix D Conductivity Measurement of BC Sheets

Average electrical conductivity 1.29 S/cm

Standard deviation 0.58

CURRICULUM VITAE

Name: Ms. Paweena Wongsukul

Date of Birth: December 1, 1986

Nationality: Thai

University Education:

2006-2004 Bachelor Degree of Engineering, Department of Materials Science and Engineering, Faculty of Engineering and Industrial Technology, Silpakorn University, Nakornprathom, Thailand

Proceeding:

- Wongsakul, P.; Tamura H.; and Rujiravanit, R. (2010) Preparation of Bacterial Cellulose Sheets with Electrical and Magnetic Properties. Proceeding of the 16th PPC Symposium on Petroleum, Petrochemicals and Polymers. Bangkok, Thailand.

Presentation:

- Wongsakul, P.; Tamura H.; and Rujiravanit, R. (2009, August 23-25) Development of Bacterial Cellulose Containing Polyaniline nanoparticle. Paper presented at the 4th International Symposium in Science and Technology 2009, Kansai University Osaka, Japan.
