สารศรี ตันเสียงสม : องค์ประกอบทางเคมีและฤทธิ์ทางชีวภาพของเปลือกต้นเปลือกเลือด

Croton robustus Kurz. (CHEMICAL CONSTITUENTS OF STEM BARKS
OF *Croton robustus* Kurz. AND THEIR BIOLOGICAL ACTIVITY)

อาจารย์ที่ปรึกษา : รศ. ดร. อมร เพชรส, 84 หน้า. ISBN 974-333-807-1.

นำเปลือกต้นเปลือกเลือด *Croton robustus* ที่แห้งและบดละเอียด มาสักด้วยตัวทำละลาย 3 ชนิด คือ เยกเซน คลอโรฟอร์ม และเมทานอล ตามลำดับ จากสิ่งสักด้วยเยกเซน โดยเทคนิคทางก่อลัมน์โครโนมาโดยกราฟฟิสามารถแยกสาร ได้ 3 ชนิด การหาสูตรโครงสร้างของสารเหล่านี้อาศัยคุณสมบัติทางกายภาพ เทคนิคทางสเปกโตรสโคปี และปฏิกิริยาเคมี สามารถพิสูจน์โครงสร้างของสารทั้ง 3 ชนิดได้ คือ สารประกอบทรงโคโรโนบานอลซึ่งเป็นสารจำพวก pentacyclic diterpene คือ trachyloban-19-oic acid (1) และ trachyloban-19-ol (3) และสารประกอบเซมนบราโนยด์ คือ poilaneic acid (2) และ เป็นครั้งแรกที่พบสาร (1) และ (3) ในพืชตระกูลเปลือก

SORASAREE TONSIENGSOM: CHEMICAL CONSTITUENTS OF STEM
BARKS OF *Croton robustus* Kurz. AND THEIR BIOLOGICAL ACTIVITY
THESIS ADVISOR: ASSOC. PROF. AMORN PETSOM, Ph.D. 84 pp.
ISBN 974-333-807-1.

Air-dried and ground barks of *Croton robustus* Kurz. used in this study. They were extracted by hexane, chloroform and methanol, respectively. The hexane crude extracts was separated by column chromatography, and gave three compounds. The structures of these compounds were established on the basis of physical properties, spectroscopic data and chemical reaction. The three compounds were two trachylobane diterpenoids; trachyloban-19-oic acid (1) and trachyloban-19-ol (3) and one cembrane diterpenoid; poilaneic acid (2). Moreover it is the first report of a trachylobane diterpeniod from the *Croton* species.

ACKNOWLEDGEMENT

First of all, the author wishes to express the deepest gratitude to her advisor, Dr. Amorn Petsom for invaluable advice, continuous guidance, encouragement, and above all his inspirational comments. Besides, his complete understanding and deep insight into the organic chemistry has not only made work on this study a rewarding experience, but also has given precious experiences which the author wishes to apply in her future research.

Grateful acknowledgements are made to Dr. Sophon Roengsumran, Dr. Udom Kokphon, and Dr. Nattaya Ngamrojnavanich for serving as Examination Committee Members. Innumerable thanks are extended to Dr. Tirayut Vilaivan for guiding the research work and Dr. Nongnuj Jaiboon and Dr. Narongsak Chaichit for helping the analysis and determined by X-ray diffraction analysis.

The author also wishes to extend her profound thanks to all her friends for their cooperation and mental supports during this work. The financial supports of the Graduate School, Chulalongkorn University is also gratefully acknowledged. Pursuing the master program at Chulalongkorn University would have been impossible without this financial support.

Last but not least the author would like to dedicate this master thesis with great respect and love to her parents for all things that they have endured and sacrificed for her success.
