ABSTRACT

4471016063 : PETROCHEMICAL TECHNOLOGY PROGRAM

Ms. Nitida Nakapreecha: Selective adsorption of natural zeolite for controlled-release of fertilizer.

Thesis Advisor: Asst. Prof. Pomthong Malakul, Asst. Prof. Pramoch Rangsunvigit, and Prof. Erdogan Gulari, 79 pp. ISBN 974-17-2290-7

Keywords : Adsorption/ Desorption/ Liquid/ Batch/ Isotherm/ Kinetics/ Ammonium/ Potassium/ Clinoptilolite.

In this study, batch liquid adsorption of NH_4^+ and K^+ ions on clinoptilolite was carried out to obtain equilibrium and kinetic data at room temperature. From the analysis of the kinetic data, conformity to the Elovich model suggested that the adsorption of both cations was governed by a heterogeneous diffusion process. Equilibrium adsorption studies showed that an increase in pH and the initial concentration of NH_4^+ and K^+ ions resulted in faster sorption and greater amounts of both ions being adsorbed. In addition, it was found that K^+ ions were adsorbed to a much greater extent compared with NH_4^+ ions. From the desorption studies using NaCl, quantitative amounts of sorbed NH_4^+ and K^+ ions on clinoptilolite could be desorbed, depending on salt concentration. When NH_4^+ and K^+ ions were equally loaded on clinoptilolite, approximately the same amount of both ions were released from the adsorbent. In contrast, when the loading ratio of NH_4^+ and K^+ ions was relatively high, a much higher amount of sorbed K^+ ions was released, suggesting that the desorbed NH_4^+ ions may also be involved in the release of sorbed K^+ . The results indicate that clinoptilolite can potentially be used for the controlled release of ions such as NH_4^+ and K^+ at desired compositions from fertilizers.

บทคัดย่อ

นิตินานาคะปริษา : การดูดซับแบบเฉพาะเจาะจงของสารประกอบซีโอไลต์ธรรมชาติเพื่อใช้ในการควบคุมการปล่อยปุ๋ย (Selective adsorption of natural zeolite for controlled-release of fertilizer) อ.ที่ปรึกษา : ผศ.ดร. ปมทอง มาลากุล ณ อยุธยา, ผศ.ดร. ปราโมช รังสรรค์ วิจิตร และ ศ. เอโดแกน กุลาริ (Prof. Erdogan Gulari) 79 หน้า ISBN 974-17-2290-7

งานวิจัยนี้เป็นการศึกษาการดูดซับแอมโมเนียมและโพแทสเซียมไอออนโดยคลินอพทิลโอไลต์โดยใช้การทดลองในภาวะของเหลวแบบกะที่อุณหภูมิห้อง การศึกษาทางจลนศาสตร์พบว่า การดูดซับและการคายแอมโมเนียมและโพแทสเซียมไอออนของคลินอพทิลโอไลต์เป็นไปตามสมการเอลโอวิช ซึ่งแสดงว่าการแลกเปลี่ยนแอมโมเนียมและโพแทสเซียมไอออนถูกควบคุมโดยกระบวนการแพร่แบบหลากหลาย จากการทดลองสมดุลการดูดซับ พบว่าการดูดซับแอมโมเนียมและโพแทสเซียมไอออนเพิ่มขึ้นเมื่อค่า pH และความเข้มข้นเริ่มต้นมีค่าสูงขึ้น นอกจากนี้โพแทสเซียมไอออนยังถูกดูดซับโดยคลินอพทิลโอไลต์ในปริมาณที่มากกว่าแอมโมเนียมไอออน การศึกษาการคายแอมโมเนียมและโพแทสเซียมไอออนพบว่าปริมาณการคายไอออนที่ถูกดูดซับเพิ่มขึ้นเมื่อความเข้มข้นของสารละลายเกลือที่ใช้และปริมาณของแอมโมเนียมและโพแทสเซียมไอออนที่ถูกดูดซับมีค่าเพิ่มขึ้น ในขั้นตอนสุดท้ายเป็นการศึกษาการปล่อยแอมโมเนียมและโพแทสเซียมไอออนจากคลินอพทิลโอไลต์ที่มีการดูดซับของไอออนทั้งสองในอัตราส่วนต่างๆ พบว่าเมื่อทำการดูดซับไอออนทั้งสองในอัตราส่วนที่ใกล้เคียงกัน ปริมาณการปล่อยออกของไอออนทั้งสองมีค่าใกล้เคียงกัน แต่เมื่อแอมโมเนียมไอออนถูกดูดซับมากกว่าโพแทสเซียม พบว่าสัดส่วนปริมาณโพแทสเซียมไอออนที่ถูกปล่อยออกมาสูงกว่าสัดส่วนปริมาณโพแทสเซียมไอออนที่ถูกปล่อยออกในกรณีแรก ในขณะที่สัดส่วนปริมาณแอมโมเนียมไอออนที่ถูกปล่อยออกมีค่าใกล้เคียงกับสัดส่วนปริมาณแอมโมเนียมไอออนที่ถูกปล่อยออกในกรณีแรก การศึกษานี้แสดงให้เห็นว่าคลินอพทิลโอไลต์สามารถนำมาใช้เป็นตัวดูดซับแอมโมเนียมและโพแทสเซียมไอออนเพื่อนำมาประยุกต์ใช้ในการควบคุมการปล่อยสารอาหารในปุ๋ยได้ดี

ACKNOWLEDGEMENTS

This thesis work was partially funded by Postgraduate Education and Research Programs in Petroleum and Petrochemical Technology (PPT Consortium).

This work gave me a precious memorable and incredibly joyful experience. However, this thesis could not have been accomplished without the assistance of graceful persons.

First of all, I would like to express my deepest gratitude to my advisor, Dr. Pomthong Malakul for his priceless guidance, constructive criticism, and admirable discussion and recommendations all the time he contributed to my work. He also teaches me the invaluable thing and encourages me through out the tough time.

I would like to thank Prof. Erdogan Gulari, my US advisor, and Dr. Pramoch Rangsunvigit, my co-advisor, for their support and proofreading the thesis.

I would like to acknowledge Dr. Sirirat and Dr. Kitipat for their kind advice and serving on my thesis committee.

I would like to extent my thankfulness to all professors who provided me the useful knowledge at the Petroleum and Petrochemical College, Chulalongkorn University. In addition, I would like to thank the Petroleum and Petrochemical College's staff for their helpful assistance and warm support.

Moreover, I would like to express my sincere thanks to all of my friends and Ph.D. students for their assistance and helpful discussion. The greatly cheerful time and the wonderful friendship mean a lot to me.

Finally, I would like to express my heartfelt gratitude to my family for their unconditional love and greatest support throughout my life. Thank you for believing in me.
