APPENDIX A

TRAINING RESULTS OF BACKPROPAGATION USING VALUES OF ADMITTED BANKNOTES AS INPUT DATA (7.3.4)

สถาบันวิทยบริการ
จุฬาลงกรณ์มหาวิทยาลัย

1. Training data for forecasting issued banknotes in 1996.

Objective: To investigate the result from using different data of the same input.

Data: Input set# 4, as mentioned in 7.2.1 and 7.2.2 (Normalization type B)

1.1 Training data: 1992-1995, Testing data: 1993-1996

1.2 Training data: 1991-1995, Testing data: 1992-1996

1.3 Training data: 1990-1995, Testing data: 1991-1996

1.4 Training data: 1989-1995, Testing data: 1990-1996

Parameter: number of neurons

Initial Conditions: Weight and bias are initialized by random, epoch = 2000, learning rate = 0.009, rate of increase in learning rate = 1.05, and rate of decrease in learning rate = 0.7.

Result: See Table A.1-A.4

1.1 Training data: 1992-1995, Testing data: 1993-1996

2. Training Data for forecasting issued banknotes in 1995.

Objective: To investigate the result from using different data of the same input.

Data: Input set# 4, as mentioned in 7.2.1 and 7.2.2 (Normalization type B)

2.1 Training data: 1991-1994, Testing data: 1992-1995

2.2 Training data: 1990-1994, Testing data: 1991-1995

2.3 Training data: 1989-1994, Testing data: 1990-1995

Parameter: number of neurons

Initial Conditions: Weight and bias are initialized by random, epoch = 2000, learning rate = 0.009, rate of increased learning rate = 1.05, and rate of decrease learning rate = 0.7.

Result: see Table A.5-A.7

3. Training Data for forecasting issued banknotes in 1994.

Objective: To investigate the result from using different data of the same input.

Data: Input set# 4, as mentioned in 7.2.1 and 7.2.2 (Normalization type B)

3.1 Training data: 1990-1993, Testing data: 1991-1994

3.2 Training data: 1989-1993, Testing data: 1990-1994

Parameter: number of neurons

Initial Conditions: Weight and bias are initialized by random, epoch = 2000, learning rate = 0.001, rate of increased learning rate = 1.05, and rate of decrease learning rate = 0.7.

Result: see Table A.8 - A.9

3.1 Training data: 1990-1993, Testing data: 1991-1994

and Testing Data (1981-1992:1993) (cont.)

APPENDIX D

PROCEDURE

FORECASTING OF THE NEW ISSUED BANKNOTES

WITH NEURAL NETWORK

สถาบันวิทยบริการ
จุฬาลงกรณ์มหาวิทยาลัย

This is an instruction of how to forecast the new issued banknotes.

Requirements

Hardware (minimum specification) : PC with CPU 80486 and RAM 16 MB

Software: MATLAB with SIMULINK program

Data: Data as mentioned earlier in 7.3.5 should be prepared appropriately and accurately.

User: The user should be able to use MATLAB and basic editors such as Notepad, Write. The user should also have some experiences of forecasting the new issued banknotes and some basic understandings of neural network.

Procedure

The following is procedure of how to forecast the new issued banknotes in 1996 with the Bckprop IV approach. It covers how to input, train, and test the data and make the forecast.

1. Start MATLAB

1.1 Double click the icon "MATLAB with SIMULINK".

2. Input data.

2.1 Click File menu and click New command with M-file option.

2.2 Then a blank window appears on the screen. The following listing is for forecasting the new issued banknotes in 1996. See the MATLAB manual [4] for explanations and details.

```
rand('seed',321457);
P = [ 13.4037
13.5415
13.6430
13.7332
13.8035
13.8705
```

sprintf('Training epochs: %.0f\n',TE)
sprintf('Final sum-squared error: %g\n',SSE);
if SSE <= err_goal
    disp('Network reached error goal.')
else
    disp('Network did not reach error goal.')
end

```

Listing 1 - Script for training

- 1.3 Save file by clicking File menu and choose Save command.

3. Train data.
 - 3.1 Double click the icon “MATLAB with SIMULINK”.
 - 3.2 Click File menu and click Run command.
 - 3.3 Fill in the file name that contains data and training scripts.
 - 3.4 Then click OK button and wait to see the result of training data.
4. Test data or make the forecast.
 - 4.1 Click in the command area.
 - 4.2 Type in data for testing or forecasting and relevant network functions as in Listing 2 or type all in a file and then copy and paste in the command area which is more convenient.

Listing 2 - Script for Testing

The values of weight and bias obtained from training process are used with testing data to earn the forecasting output. If defined, it should appear on the screen at the last scene.

VITA

Busagarin Rurkhamet was born on 25 September 1971. She graduated from Chulalongkorn University majored in computer engineering in 1992 and from International Pacific College at Palmerston North in New Zealand as a scholarship student majored in international business in 1995. She has continued to pursue her graduate study in Engineering Management at The Regional Centre for Manufacturing Systems Engineering in 1996. Having some experiences of computer programming and system analyzing for some industries and until today there are seven translated computer books of her publication in the Thai market: Microsoft Project 3.0, Unix for Dummies, Internet and World Wide Web Simplified, CorelDraw 6 for Dummies, Networking the Small Office, Microsoft Word 97 At A Glance, and Microsoft Office 97 At a Glance.
