## APPENDICES

## Appendix A Experimental Data of the Phase Diagrams

### **1. Solubilization Parameter (SP)**

The solubilization parameter of oil (SP<sub>O</sub>) and water (SP<sub>W</sub>) are designed as:

$$SPo = \frac{Vo}{Ms} \quad \text{and} \quad SPw = \frac{Vw}{Ms}$$

Where  $V_o$  = volume of oil solubilized

Ms = weight of surfactants

**V<sub>w</sub>** = volume of water solubilized

## 2. Interfacial Tension (IFT)

The interfacial tension of each phase of microemulsion is calculated by following formulation:

$$IFT = e(Vd)^3 n^2 \Delta \rho$$

Where IFT = interfacial tension (mN/m)

$$V = 0.31 \text{ (mm/sdv)}$$

$$e = 3.427 \times 10^{-4} (\text{mN cm}^3 \text{ min}^2 / \text{m g mm}^3)$$

**d** = diameter of the measured droplet (sdv)

**n** = number of revolution or speed (rpm)

$\Delta\rho$  = the density difference between the heavy phase

and the light phase ( $\text{g}/\text{cm}^3$ )

### 3. Experiment Data of Solubilization Parameter

## Appendix C Experimental Data of Detergency Experiments

### 1. %Detergency

The detergency performance can be determined by %detergency. It is calculated from the following equation:

$$\%Detergency = [(A - B)/(C_0 - B)] \times 100$$

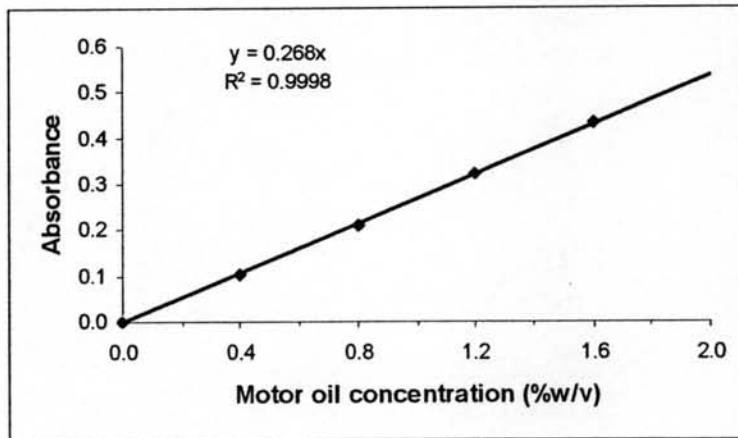

Where      A = the average reflectance of the soiled swatches after washing

B = the average reflectance of the soiled swatches before washing

$C_0$  = the average reflectance of the unsoiled swatches before washing

### 2. %Oil Removal

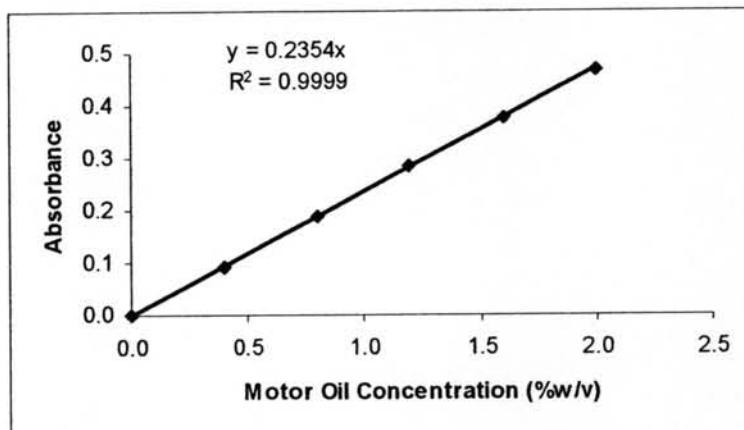

The oil removal is calculated from the calibration curve for colored motor oil

**Figure C-1** Relationship between colored motor oil concentration (%w/v) and the absorbance measured at 520 nm by using iso-propanol as solvent.

## CURRICULUM VITAE

**Name:** Miss Ampika Nakrachata-amorn

**Date of Birth:** September 9, 1983

**Nationality:** Thai

### **University Education:**

2001-2005 Bachelor Degree of Science in Industrial Chemistry, Faculty of Science, King Mongkut's Institute of Technology North Bangkok, Bangkok, Thailand.

1998-2001 Secondary School (M.6), Department of Math-Sciences, Satrinonthaburi School, Nonthaburi, Thailand.

### **Working Experience:**

2004-2004 Position: Trainee

Company name: Mahasawat Water Treatment Plant,  
Metropolitan Waterworks Authority,  
Nonthaburi, Thailand.
